A NEW EXPERIENCE

WELCOME TO A NEW SERVICE EXPERIENCE

Conceptia's industry experts tailor solutions for each of their clients, to the best fit. Our well trained and experienced engineers are ready to go that extra mile to ensure a delightful experience for you.

A STRATEGIC PARTNER FOR YOUR ENGINEERING ENDEAVOUR

The process of building either a land based or a marine asset such as a ship, a process plant or an industrial infrastructure, is a complex one. Conceptia works side by side with your engineering team as a strategic partner.

** Conceptia is a strategic partner to Pipavav Shipyards Ltd., Gujrat, India*

We invite you to experience the benefits of conceptia's service. I offer our engineering team to your engineering department as a strategic partner so that together we complete many more projects than what we would have done separately.

CLARITY OF THOUGHT

COMPLEX SPACE ENGINEERING

Engine Rooms and Machinery spaces inside Ships and Submarines are very complex spaces, arrangement-wise. Various considerations such as ergonomics, provision of maintenance envelopes, easy accessibility for emergency operations etc are required. Conceptia's engineers are trained to optimize layouts in complex spaces.

DESIGN FOR OPERATION & MAINTENANCE

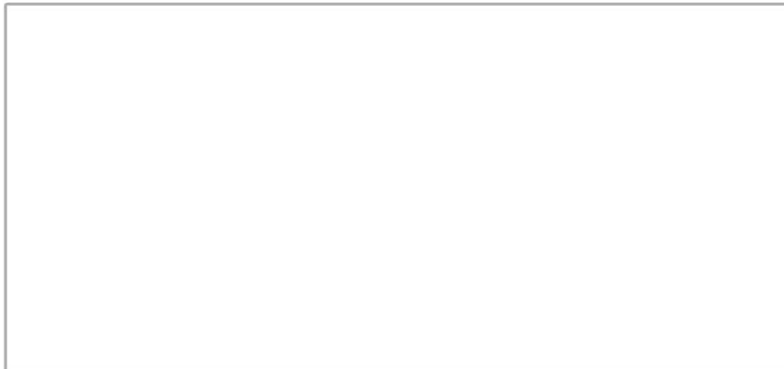

A land based asset such as a Process plant or a marine based asset such as a warship or a semi-submersible is designed for an operational life in excess of 25 years. Conceptia's engineering teams work for your projects with a focus on ensuring that the operation and the maintenance of the asset is completely hassle-free.

Smart engineering for your land based and marine assets is our business. We provide you with software systems that capture all your design, construction, operation and maintenance related data for complete traceability and quick report generation.
