Industrial Engineering Business

The engineering of the product such as ships is a Conceptia forte. Looking beyond the Ship itself, our industrial engineering business is also concerned with the creation of supporting infrastructure facilities such as Goliath cranes, industrial sheds and facilities for utility systems for Water, Compressed air and Gas supply to industrial sheds and building berths.

This also includes captive power plants, water supply, roads, waste management, drainage and effluent treatment. We cater for customers who are self-contained and for those who provide facilities to industries gathered in a dedicated location such as SEZs.

Industrial Engineering Services

- Industrial layout for maximizing automation
- Material flow management and simulation
- Preparation of engineering drawings and documentation
- Working with your teams for capacity augmentation
- Production process analysis and improvement
- Industrial infrastructure modernisation

About Conceptia

Conceptia designs and delivers IT enabled solutions that help engineering companies to win in the race to get their products to market faster. These solutions enable clients to differentiate themselves and gain operational superiority. Conceptia solutions are based on the wealth of information and expertise available to be leveraged by clients.

With Conceptia clients are assured of an efficient business partner with processes that help in delivering on-time always.
